Stephen:

NORCO shall provide to EPA a detailed work plan and schedule of remaining activities required in the removal action within 10 days of the effective date of this agreed order, and complete performance of the work no later than December 31, 2011. The contents of all tankage shall be removed and disposed, and all tankage cleaned and gas freed no later than August 1, 2011. Additionally, all visibly contaminated soils, including those under tankage shall be removed and properly disposed by December 31, 2011.

The word "all tankage" also includes the tank shown in this attached powerpoint as well as all the other tanks located on NORCO "Falcon" property.

I am approving TRC Companies, Inc. and you are authorized to immediately resume work at the refinery while preparing the documents required above. You may also have to provide additional information associated with your QMP. I will let you know of any comments that need to be addressed in addition to the need for signatures for the QMP.

Thanks

Gary Moore
